Passionate about designing, developing and implementing engaging products.

EXPERIENCE

Link Up Festival, Waterloo— *Web Developer Volunteer*

June 2020 - Current

I used my Wordpress experience to volunteer with Link Up – a yearly festival to celebrate African Caribbean cultural diaspora. This year their festival took place online and my duties were as follows:

- Adding new content to the website
- Designing and building their marketplace page
- Installing and setting up Woocommerce
- Developing a plugin for their marketplace that allows them to manage their festival vendors

Freelance — *Web Developer and Designer*

August 2019 - Current

These are some of the projects I've worked on as a freelance designer and developer:

- Designed and developed an e-commerce store for Sketch To Animate LLC using Wordpress and Woocommerce. Designed and implemented an FAQ chatbot using Landbot.io for the storefront.
- Designed the brand identity for charity organization Afrosteps, designed their website and built the site using Wordpress.

Karbon Black, Pretoria— *Design/Developer Intern*

Feb 2018 - July 2018

I designed the UI/UX and developed websites using Wordpress, and worked alongside clients on projects designing and modifying the end product to their business requirements.

- Designed the website for the restaurant Mooi (www.mooitapas.co.za)
- Designed and developed for Huntlink (huntlink.co.za) and Earth Friendly Solutions (www.efsol.co.za)
- QA tested websites for clients.
- Updated inherited websites that were built with React and

SKILLS

Coding

HTML, CSS, SASS, Javascript, ThreeJS, WebGL, JQuery, PHP, Wordpress, Woocommerce, git, MySQL, ASP.NET Core (C#)

Design

Figma, Adobe Illustrator, Photoshop, XD, After Effects

Enthusiastically learning

React, React Native, ES6, Gatsby, GraphQL, Unit testing (NUnit for .NET Core, Jest for JS)

deployed them using Docker.

University of Pretoria, Pretoria— *University Tutor*

Jan 2015 - Dec 2017

I assisted lecturers with grading homework, organizing schedules and designing tasks for students taking a degree course in Computer Science. I also helped students with their course work for various modules including Intro to Computer Science and Operating Systems.

Sevara, Pretoria— *Web Developer*

Jan 2017 - Dec 2017

I developed a website for a startup clothing company that sold their products through an ecommerce store.

- Developed an ecommerce store using Wordpress and Woocommerce.
- Updated their content and did monthly maintenance on their website.

PROJECTS

Myanmar Photo Album

I developed this project to create a family album of a trip to Myanmar in 2017 and to experiment with engaging animations and layouts. The animations were created with anime.js and I used SASS.

Scimatics Solutions Homework Tracker

During my university studies, I worked for a tutoring company that provided homework assistance for high school students. I saw a need for the company to obtain an efficient way to keep track of the student's progress and to log their homework, so I designed and developed a web app MVP for them. This was my first attempt at building an MVP for a client and I learnt a lot about using PHP and MySQL for my backend. The app was developed using a LAMP stack and it was deployed and utilised by the company.

EDUCATION

Conestoga College, Kitchener— *Web Design and Development*

May 2020 - April 2022

Modules completed: Responsive Site Design, Javascript Programming, Web Security, Database Design and Management, Advanced Programming with .NET

Vancouver Film School, Vancouver— *Classical Animation*

Aug 2018 - Aug 2019

I studied traditional and digital animation for this one year intensive course. The course entailed various traditional animation assignments to teach the 12 principles of animation and producing 2 student films by the end of the year. The digital tools I used to produce my films include ToonBoom Harmony and the Adobe Suite.

University of Pretoria, Pretoria— *Bachelor of Information Science in Multimedia*

Jan 2015 - Dec 2017

Modules include: Computer graphics, Computer networks, Programming languages, Data structures and algorithms, Operating Systems, Visual design, Computer organisation and architecture, Information Science.

PERSONAL INFORMATION

I have a love for story-telling in all forms, that's why my interests include animation, films, dance and gaming. I try to put that creative energy and enthusiasm in my development work.
